

NOCTI Hands On Study Notes

Color Cast Methods (Simplest to Hardest)

Match Color Method:

1. Command J – to make a copy of the background layer.
2. Select Image>Adjustments>Match Color>Neutralize – adjust luminance and color intensity

Blur Average Method:

1. Command J – to make a copy of the background layer.
2. Select Filter>Blur>Average – this will show bad color
3. Command I – to invert the color which is the fix
4. Adjust Blending Mode to best choice in Overlay group.

Hue/Saturation Method

3. Command J – to make a copy of the background layer.
4. Adjust Saturation/Lightness slider on the chosen color (not the master color)
