• Print management, color correction  
• Web template design & production
Ancient Tile Architecture

Showcasing the most diverse collections of art from around the globe, the Berliner Museum of Art has become a popular location of discovery, history and cultural enlightenment in the metropolis of New York City.

Each year, the museum brings great dimension and graphical diversity by adding new exhibits and individual pieces of art from all over the world, in all areas of painting, sculpture and pottery, to design, photography and architecture.

You are invited to join an evening of gallery previews at the Berliner Museum of Art.

Tile Shower Architecture

Old Style

Showcasing the most diverse collections of art from around the globe, the Berliner Museum of Art has become a popular location of discovery, history and cultural enlightenment in the metropolis of New York City.

Each year, the museum brings great dimension and graphical diversity by adding new exhibits and individual pieces of art from all over the world, in all areas of art from painting, sculpture and pottery, to design, photography and architecture.

As the Berliner prepares to launch the newest exhibits for the 2005 season, you are invited to join an evening of gallery previews and celebrations of art, offering you the unique chance to meet some of the artists and designers who have kindly donated their work for this coming season.

The Berliner Museum of Art welcomes you to the Launch of the 2005 Exhibits.

Create a New Document – Size, Margins

1  New Document > File > New > Document > to create Business Card
   1  Document Preset > Default
   2  Number of Pages
   3  Facing Pages > OFF
   4  Page size > Letter > Default
   5  Columns s1 > Default (always have at least 1 column)
   6  Margins > Non-printing guides for layout positioning > Left .75 (3) hole punch.

   ![New Document dialog box]

2  Save or Save As
   1  File > Save As > MyBizCard.indd

3  Setting Views
   1  Zoom Tool > Double click on tool to 100%
   2  Hand Tool > Double click on Hand tool > Fit To Screen Size
      Hold option/alt (first) + space bar > hand tool > move screen.
   3  Command +/- > Window Remains Same Size
      Command/control 1 = 100%.
      Command/control 2 = 200%.
      Command/control 0 = Fit to Monitor
Add Type in a Frame – All Page Elements Use a Frame

1 Draw a text frame (all frames can contain text or graphics or both)
   1 Select the Text Tool > Click drag a frame from upper left corner to lower right corner.
   2 See text cursor, start typing or copy/paste or Type menu > Fill with Placeholder Text.
   3 Start over: Undo Command > Edit Menu > Undo (command/control Z).
   4 Note: Frames snap to margin or guides.
   5 Use Options Bar on top to format text and paragraph.

   A = formats text attributes
   Paragraph Sign = formats paragraph attributes

2 Draw frames using rectangle tool for photo safari flyer type
   1 Draw Frames
   Name
   Contact Information
   Employment skills, advertising, etc.
   Logo
   Background (Master Page)
   4 Left Align Frame 3 > Options Bar.

3 Select a word or a sentence
   1 Select one word > double click.
   2 Select sentence > triple click
   Tip: Double click first word, then single click once that word to select next word, repeat.
   3 Select paragraph > four clicks.
   4 Select All > com/ctrl A.

(continued next page)
Working with Frames – Resize, Move, Options

1 **Resize a frame > select handles with selection tool**
   1 Can use Options Bar to set exact dimensions.
   2 **IMPORTANT**: Set the **Reference Point** (point from which scale occurs).

2 **Move the page on screen**
   1 Use **Hand Tool**.
   2 **Tip**: Hand Tool > press > opt/alt + space bar (press opt/alt FIRST).

3 **Show Hidden Characters > Type menu > Show Hidden Characters**
   1 See word spaces as dots.
   2 See hard returns as paragraph symbols.
   3 See soft return symbol (shift return).
   4 See end of text as Pound Sign.

4 **Note: add columns to text frame**
   1 Select frame with Text tool.
   2 Choose Object Menu > Text Frame Options > Columns (or use options bar).
Apply Text Attributes

1 Select a word or a sentence
   1 Select one word > double click.
   2 Select sentence > triple click
      **Tip:** Double click first word, then single click once
      that word to select next word, repeat.
   3 Select paragraph > four clicks.
   4 Select All > com/ctrl A.

2 Apply type attributes using options bar
   1 Select type.
   2 Attributes are applied to the selected type.
   3 Select the “A” Icon on Options Bar (far left).
   3 Choose type attributes from the Options Bar.
      Font and font style.
      Size and leading (Auto is good place to start).
      Kerning: space between TWO letters, numbers, symbols.
      Space can be increased or decreased.
      Tracking: space between more than two letters, numbers, symbols.
      Creates space on the selected type.
      Space can be increased or decreased.

3 Paragraphs
   1 Press Return Key.
      This creates a new line of type below and creates a new paragraph.
   2 Press Shift Return.
      This creates a new line of type BELOW — BUT KEEPS it as the same paragraph.
   3 View paragraph symbol markers > Type menu > Show Hidden Characters.
   4 Line space (or leading) is the space between the top type line and the one under it.

4 Apply spacing between lines using space after option (this is a very useful tool).
   1 Click anywhere inside the paragraph ABOVE, applying space pushes bottom line down.
Add Photos, Graphic, Artwork – with Place Command

1. **Place photo, graphic, logo, artwork (.psd, .jpg, .pdf, .ai, .eps, .tif, .png)**
   1. File menu > Place (see Files in **Links** Palette)
   2. Turn Off > Show Import Options.
   
   ![Show Import Options](image1)
   
   - **Show Import Options**
   - **Replace Selected Item**

   3. Selected Frames > contents will be replaced when placed.
   4. See icon and click on page.
   5. Use Page Grid > View menu > Grids & Guides > Show Document Grid.
   6. Use Selection tool to move element on page.
   7. Use Arrow Key to nudge with each click (up/down, left/right).

2. **Scale photos and artwork, also called resize**
   1. Select frame.
   2. Use Options Bar on top

   ![Options Bar](image2)

   3. Turn on the Constrain Proportions Lock.
   4. Choose **the reference point** (center is chosen above, scales from this point).
   5. Enter new Percent, press return or enter (key pad).
Working with Guides & Grids

1. Create guides on separate layer > hide and show easily

2. Change margin guides position > Layout menu

3. Ruler guides
   1. Create guides on a layer.
   2. Change zero point setting.
   3. Reset ruler zero point.
   4. Hide/show guides > com/ctrl ; (semi-colon)
   5. Bleed to edge 1/8 inch is standard.
   6. Delete guides (double click selection arrow > window runs).

4. Grids
   1. Setup Grids in Preferences (com/ctrl K).
   2. Tip: use either .5 or .25 and 1 increment.
   3. Turn Off > Grids In Back.
   4. Hide/show grids > com/ctrl ' (apostrophe)

5. Layout Adjustment > command > auto adjusts new margins
   1. Layout menu > Layout Adjustment.
   2. Enable ON allows objects to auto adjust when changing margins.
**Draw Lines – Stroke, Shapes, Color, Gap Color**

1. **Line Tool > select > click drag > shift to constrain**
   1. **Tip:** Drag guides from rulers > com/ctrl R > lines snap to guides.
   2. **Tip:** Stroke palette > double click on line tool.
   3. **Tip:** Use Transform palette > double click rotation tool.
   4. Straight or diagonal line > shift to constrain.
   5. Move > select > nudge > use arrow keys.
   6. Increase line width by stroke weight > stroke palette.
   7. Resize line > select drag handles > see transform palette next.

2. **Stroke palette with options**
   1. Type options (various line designs).
   2. Cap settings > butt cap, round cap, projecting cap.
   3. Start and End: adds graphics: circle solid, triangle wide, etc.
   4. Gap color shows color between dashes.

3. **Color > Swatches palette**
   1. Stroke applies color to line types.

4. **Transform palette or Rotate tool**
   1. Resize line: check Reference Point first (Options Bar).
   2. Reposition line by X and Y numbers.
   3. Rotate uses Reference Point in Options Bar.
   4. Skew by degrees.
Add Borders – Uses Frame Stroke

1 Create a line or border
   1 Lines or borders are strokes on the following:
      rectangle, pencil, Pen tool path.
   2 Select Rectangle tool.
   3 Draw a frame around edges of document.
   4 **Tip**: Rectangle elements select as a solid object, even though it looks transparent.
   5 **Tip**: while on the Selection tool, press Command key Mac or Control key Windows and Click to select an underlying element.

2 Open Stroke and Swatches palette
   1 **Border thickness is called a stroke**.
   2 Strokes create line weight (thickness).
      Stroke weight is measured in points.
      Reference: 72 points in one inch.
   3 Choose Stroke icon (versus Fill icon).
   4 Use Stroke palette to apply stroke weight in points.
      Example: 20 pt.
   5 Choose > Type of Stroke (graphic style).
      Example: Wavy
   6 Choose > Gap Color.
   7 Create new color under Swatch palette options.
      New Color Swatch
      Choose: Color Type: Process
      Choose: Color Mode: CMYK
Working with Layers – Allows Stacking Order (front, next, back)

1. **Layer 1 is default layer (blue)**
   1. Open Layers palette > Window menu.
   2. Layer 1 is the default layer.
   3. All elements will be created on layer 1 by default, until another layer is created.

2. **Create a new layer and move graphics to layer**
   1. Click on New Layer icon (next to trash icon).
   2. Select the Border.
   3. Drag square to new layer (creates stacking order).
   4. Stacking order means top most element appears closest to the eye.
   5. Stacking order can be changed using Object menu > Arrange.

3. **Name a layer & select a color**
   1. Double click on layer to name/color.
Adobe PDF – Characteristics

1 Adobe PDF – Portable Document Format

About PDF files

1. All PDF files can be viewed FREE with Adobe Acrobat READER. All new computers come with Acrobat READER installed. Latest versions of Acrobat READER can be updated free from Adobe at: http://www.adobe.com/products/acrobat/readstep2.html

2. PDF files are viewed with Acrobat READER or Acrobat Pro.

3. PDF can be printed, if printing option is left ON.

4. PDF files embeds fonts, graphics, movies, sounds, URL’s, email, hypertext links.

5. Acrobat Reader v.6, or later is required to play PDF files with movies/sounds.

6. PDF files can be placed into InDesign documents, just like photos/graphics.

7. PDF files cannot be edited inside InDesign.

8. PDF files can be edited using Acrobat Pro – to some extent.

   Editing is not the same as native application.

10. PDF files are “known” by all printers, PDF prints easier/quicker than other file formats.

11. PDF files can contain bookmarks, thumbnails, URL, email live links.

12. PDF files make great presentations. All you need is Acrobat Reader.

13. PDF file sizes can be very small for web and presentations.

14. PDF files are easily created as export most any application.

Continued Next Page > Export PDF from InDesign
Export to PDF – CMYK Press, Web, Presentations

1 Export PDF from InDesign
   1 Save the current document > File menu > Save.
   2 Choose File menu > Export > choose PDF format in the pop up menu.
      Tip: Be careful, this sometimes format comes up as Tagged Text format automatically.
      Be sure to select > Adobe PDF

2 Adobe PDF Preset
   1 Use: Web Viewing (for web and presentations).
   2 Turn ON Bookmarks > under Include.
      Applying this setting modifies the default options for Web Viewing.
      Therefore, Web Viewing (modified) appears under Preset.
   3 Compatibility: choose Acrobat 8 (PDF 1.7).
   4 Pages: All or Range (hyphen is a range, comma allows series of pages)
   5 Always REVIEW the PDF after Export — what you see is what you get.
      If something is missing, Export again.

For CMYK Press
   Compatibility: Acrobat 4 (PDF 1.3)
Global Preferences & Defaults Setup

1  Set global defaults (preferences) for all new files — no files are open
   1  All NEW files will now open with new global settings (preferences).

2  File > Preferences
   1  Units & Increments.
   2  Preferences > Guides.
   3  Preferences > Dictionaries > choose language.

3  Layout Menu > Margins
   1  Reminder > B&W laser printer edge cuts off at .25.
   2  Layout menu > ruler guides.
   3  View threshold > below % guide disappears.

4  Paragraph Styles Palette > create default text attributes
   1  Create New Style Button > set font, size, align, indents, tabs, hyphens off/on, characters, colors.
Palettes Setup, Tools, Keyboard Shortcuts

1 All palettes location > Window menu
   1 Dock palettes
   2 Nest palettes
   3 Groups palettes
   4 Reposition palettes
   5 Save Palettes as Workspace
      Window menu > Workspace.

2 Tool palette shortcuts > double click on tool
   1 Line tool > Stroke palette.
   2 Rotation tool > Transform palette.
   3 Color chip > Color palette.
   4 Gradient tool > Gradient palette.
   5 Tip: Palette states
      Double click on tab to see multiple options.

3 Keyboard shortcut commands
   Edit menu > keyboard shortcuts
   1 Create a New Set > FIRST
      (don’t disturb the default set).
   2 Set new shortcut.
      BE SURE TO ASSIGN > click Assign button.
Links Management

1 Overview of Links palette
   1 Open Links palette > Window menu > Links.
   2 Placed objects are linked to files on hard drive.
   3 Cannot move files from folder once linked.
      If files are moved from Linked folder link appears with Red Ball with question mark (it’s missing).

2 Link problems show upon opening a file

3 Links Changed Shows a Yellow Caution Triangle
   1 Caution icon means linked file was changed.
   2 Changes to files are NOT automatically updated.
   3 Select palette option, choose Update Link.

4 Changes to original file
   1 Changes are stored in auto Recover Folder moment to moment.

5 Placed text updates
   1 Caution: if you update a outdated text link it will delete ALL current formatting.
   2 Warning box comes up and tells you.
   3 Can revert if accidently updated.
   4 Usually best to embed text > takes little memory.

6 Embed links in palette option menu
   1 Becomes permanent part of file.
   2 This is good for text > small file size.
   3 Increases file size by amount of file.

7 Copy and pasted text is automatically embedded to file

8 Edit original > inside application
   1 Select file in Links palette > choose Edit original > open application.

9 Update link > palette menu
   1 Graphics will be updated.
   2 Shift select for multiples updates.
Spell Checker

1 What can you spell check
   1 Selected range of text.
   2 All text in a story or a text frame (Story).
   3 From insertion point to end of story (To End of Story).
   4 All stories in a document (Document).
   5 All stories in all open documents (All Documents).

2 What does spell check report
   1 Highlights misspelled or unknown words.
   2 Words typed twice.
   3 Possible capitalization errors.

3 How to check spelling > Edit menu
   1 Narrow the search, click inside a text frame.
   2 Select text to check only that text.
   3 Select one or more text frame with selection tool to check multiple stories.
   4 Choose Search Mode Type from popup menu at bottom of dialogue box.
   5 Standard controls > Start > Change > Change All > Ignore.
Autocorrect Spelling

1 Autocorrect – add or remove words in dictionary
   1 Choose InDesign menu > Preferences > Autocorrect.
   2 Add button.
      Click Add button to enter a new Misspelled word combination.
      **Tip:** Copy/paste your misspelled word into Misspelled Word box.
Library – Images, Art, Type, Objects, Pages

1 Libraries
   1 Library is a collection elements by types.
   2 Element types are defined by InDesign as:
      Images (any pixel files formats, tif, jpg, pct, etc.)
      EPS (vector artwork, including Illustrator file format).
      PDF (Adobe Acrobat files saved as PDF).
      Geometry (lines).
      Page (all objects on a single page).
      Text (text frames with format retained).

2 New Library
   1 Choose File menu > New > Library.
   2 Name and save (.indl suffix)

3 Open New Existing Library
   1 Choose File menu > Open.

4 Adding objects or pages to Libraries
   1 Click drag elements into library.
   2 Automatically saves elements.
   3 Photos, artwork elements are linked files.
      Linked files cannot be moved.
   4 Group multiple elements using shift.
      Drag selected items to library.
   5 Use Library Options menu to:
      Add item
      Add items on Page (all items)
      Add items on Page as Separate Objects

5 Info button
   1 Select Item in Library, click Info Icon.
   2 Tip: Double click on icon to get info box.

6 Search for items
   1 Click on Binoculars Icon
1 Help features
   1 Help is easy and handy, it is the manual and lots more.
   2 Choose Help menu > InDesign Help.

2 Index
   1 Use Key Words.
   2 Listing alphabetically.
   3 Plus means, open for more.
   4 Minus means, close.
   5 Arrows for next and previous.

3 Contents
   1 Organized by Major topics.

4 Search
   1 Use key word (color printing).

5 Bookmarks
   1 Open Page on Web, then bookmark as web page.

6 Print button
   1 Click print button upper right.
Gradients – Create, Change, Manage

1 Create Gradients using Swatches Palettes – colors must be saved as swatches
   1 Gradients are applied as stroke and/or fill.
   2 Open Swatches palette > Window menu.
   3 Create two saved colors or use existing color swatches.

2 New Gradient
   1 Must be two saved colors in swatches palettes.
   2 Select one color marker before selecting a Stop Color.
   3 Choose first Stop Color as swatches, pick a swatch color.
   4 Choose second Stop Color as swatches, pick a swatch color.
      If CMYK color is used, all Stop Colors should be CMYK.
      If Spot color is used, all Stop Colors should be Spot Color.
      Do not mix color types (no Spot to CMYK).

5 Tip: Trumatch colors found under Color Mode when creating a new swatch is a great choice for creating CMYK gradients.
Typography

1 **Six steps typography**
   1 Set initial type size visually.
   2 Set initial leading > space between lines.
   3 Set initial tracking > space between words.
   4 Tweak word spacing using kerning > space between letters, numbers, pairs.
   5 Tweak word sizing by horizontal or vertical scale.
   6 Special characters and drop caps.

2 **Open Characters & Paragraph palettes > com/ctrl T**

3 **Turn on > Show Hidden Characters > Type menu**
   1 See word spaces, paragraphs, soft paragraphs, tabs

4 **Type size**
   1 Commands > make typography visual joy
   2 Shift + com/ctrl > greater than and less than signs
   3 Default increase by 2 points
   4 Preferences > Increments change to 1 point
   5 Select palette > use arrows
   6 Shift arrow = 10 graduations

Leading

1 **Base line**
   1 Based on distance between baseline on top to baseline on bottom.
   2 Baseline formed at bottom of X-height.
   3 Auto leading > 120% > size plus 20%.
   4 Manual leading (also called vertical spacing).
   5 Using commands > select type > opt/alt up/down arrows keys.
Typography (continued)

1 Optical margin alignment
   1 Aligns punctuation marks to offset margin and look more aligned.
      Quotes, dashes, commas.
   2 Type menu > Story > Optical alignment on > key point size.

2 Horizontal spacing

3 Tracking
   1 Adding equal distance between letters and words.
   2 Using commands > select type > opt/alt left/right arrows keys.

4 Kerning
   1 Add space between two pairs > letters, numbers, characters, combos.
   2 Em space > point size squared.
   3 Fraction of that space > 1/50th default.
   4 Change > Preferences > increments > 1/100th.
   5 Metric kerning > you do it > wider than optic.
   6 Optical kerning > InDesign looks at best option.
   7 Hanging punctuation.

4 Scaling type

5 Horizontal scaling
   1 Scale by percent > 150% Head.
   2 All characters receive amount.
   3 Select palette > use arrows.
   4 Shift arrow = 10 graduations.

6 Vertical scaling
   1 Scale by percent > 130%.
Text Threading

1 Text Threading defined
   1 Fancy way of saying, flowing of text from one text frame to another.
   2 Text can flow on one page only or from page to page.

2 Create text frame columns
   1 Layout menu > margins & columns.

3 Place text > File menu > Place

4 Place text options
   1 Retain format.
   2 Convert quotes.
   3 Show import options > for more detail.

5 Place icon symbols
   1 Text icon > seen first.
   2 Text icon changes to white near guide.
   3 Flows margin to margin.

6 How text threading works
   1 Flow text from one frame to another.
   2 Toggle between text tool selection arrow > com/ctrl.
   3 Red cross in the outport means more text in frame.
   4 Selection arrow > click red cross > text thread icon appears.
   5 Click drag to form new frame size or click on existing frame.
   6 Once text flowed > see blue direction arrow inside inport.

7 Semi-Auto text flow > save time
   1 Opt/alt for semi-auto flow.

8 Auto text flow > flow all text automatically
   1 shift key for auto flow.
   2 Text flows to current page > opens new pages as needed.

9 Show > text threads
   1 Text threads are connecting lines between frames.
   2 View menu > hide and show text threads.

(continued)
Text Threading – continued

10 Flow text from page to page
   1 Navigator palette > Window menu > or use Hand tool.
   2 Select Outport > draw new frame.

11 Managing threaded text frames
   1 Delete a threaded text frame.
      Select text frame > delete > text flows backward or forward, nothing lost.

   2 Copy and paste a frame to another page > select tool.
      Copies ONLY visible contents of selected frame.
      Copy ALL content from first frame > go to first frame > copy contents.

   3 Copy text frame > select > Opt/alt drag > copies.

   4 Cut/copy, then paste that frame to another page.
      Use select tool.
      IMPORTANT: Cut command ONLY takes the visible contents of selected frame.
      It does not cut hidden text below frame.
Master Pages

1. **What is a Master Page > Pages palette (top section above line)**
   1. Master page acts like a background under any document page (saran wrap).
   2. Used Master Page for repeated objects on many pages such as:
      - page numbers, borders, backgrounds, logos, artwork, headlines, text frames.
   3. Master Page A is default > Pages palette.
      - Master Page A is APPLIED to all NEW pages automatically.
      - Any page can change it’s Master or have NO Master.
   4. Unlimited numbers of master pages can be created.

2. **Draw Elements on Master Pages > frames**
   1. Draw rectangle > it is initially unassigned.
   2. Assign frame > as text frame.
   3. Assign frame > object menu > content > text.
   4. Add type > add EPS logo file > to master page.

3. **Apply Master Pages**
   1. Drag master page onto page any page.
   2. Palette Option menu > select page > select master > apply master to pages.
   3. Show and Hide > master page items > view menu.
   4. NONE > drag none to a page none icon.

4. **Overriding Master Page Items (IMPORTANT)**

Glyphs Palette – World of Icons, Symbols & More from Any Font

1 Glyphs palette
1 Choose Window > Type & Tables > Glyphs or Type menu > Glyphs.
2 Insert cursor in text frame.
3 Select the Font at the bottom.
4 Single click the larger or smaller icons to view.
5 Double click on Glyph character to enter into text frame.
6 Backspace to delete character from text frame.
**Ellipse Text Frame**

1. **Ellipse tool > drag > shift to constrain**
   1. Transform palette > double click on rotation tool.
   2. Stroke and fill > double click on line tool for palette.
   3. Apply Colors > swatches palettes.

**Text Frame Options**

1. **Text frame options > Object menu**
   1. Columns
   2. Inset Spacing
   3. Vertical Justification
Pen Tool

1 How to draw with the Pen Tool
   1 Pen tool creates vector frames, which can contain text or graphics.

2 Learn to draw with Pen Tool
   1 Set up Pen tool for drawing.
   2 Weight > dip pen in ink first > stroke > double click on line tool.
   3 Color > F5 for color swatches.
   4 Guides > com/ctrl R > rulers > lock guides > view menu.

3 Quick review straight lines
   1 Click > set anchor point > shift > constrain to straight line.
   2 Anchor points support segments > segments create paths.
   3 Select tool > move > resize.
   4 Add graphic at start and/or end of line > stroke palette.
   5 Change line dimensions > direct select tool > transform palette.

4 Selection process
   1 Selection arrow > it’s whole.
   2 Direct Selection arrow > it’s parts.

5 Diagonal line
   1 Paths are open or closed.

6 Learn to draw curves
   1 Bell Shape Template.
   2 Switching Controls Template.
   3 Maze Practice Template
Auto Page Numbers & Sections

1 **Apply Auto Page Numbers to ALL pages > use Master Pages**
   1 Go to a Master Page > Window menu > Pages.
   2 Draw text frame to contain page number and description.
   3 Apply Auto Page Numbering (frame must be on a Master Page).
      Click inside the new text frame with the Type tool.
      Type the word – Page and add one space.
      Choose > Type > Insert Special Character > Auto Page Number.

2 **Numbering & Section options to define multiple sections on Master Page**
   1 A Section defines a range of page numbers and the number style on a Master Page.
   2 Section page numbers are auto numbering of page styles on a master page frame.

3 **Default Section Marker is applied to first page (see triangle icon)**
   1 Double click on triangle to open or go to palette options.
   2 Default Style for numbers: 1, 2, 3, 4 (use pop up to choose other styles).
   3 Default Page Numbering Starts at 1.
   4 Sections Styles > show up in Pages palette by default.
      Change Page Style to Absolute Numbering > Preferences > General.

4 **Section Marker – create a section label**
   1 must have text frame long enough to contain text label.
   2 Must Insert > section label > tells it to hold the section marker.
   3 Contact sensitive menu > insert special character > section.
   4 Start section.
   5 Insert section marker > non master page applied.
      Text frame big enough.
      Insert > section marker > special character.
      Insert > auto page number > special character.

5 **To Turn off section numbers**
   1 Open Options > Uncheck > Start Section.
Star Burst

1 **Polygon Tool > creates a text frame**
   1 Select polygon tool.
      Double click on tool for options.
      Opt/Alt click on page for dialogue box.
   2 Set stroke/fill colors.
   3 Set stroke weight.
   4 Set Miter Limit.

2 **Transform palette**
   1 Scale tool > double click to size.
   2 Set reference point in options bar.

3 **Text > inside polygon**
   1 Text tool > little tricky inside polygon.
   2 Text frame options > leading > 1st baseline.
   3 Center align.
   4 Vertical scale (150%).
   5 Edit vectors > zoom > direct selection.
Text Wrap Palette

1 Wrap around object shape
   1 Clipping Path applied to the placed image from Photoshop.
   2 Text in back > graphic in front > select graphic.
   3 Open > Text Wrap Palette > Object menu.
   4 Select > Wrap Around Object Shape.
   5 Set > Inset values > .05.
   6 Adjust anchor points if needed to tweak.

2 Special effect > invert
   1 Wrap within the shape of object.
   2 Resize text frame > OVER object.
   3 Choose > Wrap Around Object Shape > then click Invert option on.

3 Jump object

4 Jump to next column

5 Ignore text wrap > don’t wrap
   1 Select text frame
   2 Object menu > Frame Options > bottom ignore

Ancient Tile Architecture
Drop Caps

1. **Drop Caps via Paragraph palette**
   1. Easiest way via paragraph styles.
   2. Paragraph palette > type menu > paragraph.
   3. Turn on > Show Hidden Characters > Type menu.

2. **Paragraph style > easiest to apply > mouse click**
   1. Paragraph style > Type menu > NO selections.
   2. New paragraph style > name it > Drop Caps.

3. **Other paragraph settings**
   2. Basic character formats.
   3. Advanced character formats.

4. **Drop Caps**
   1. Set > Drop Caps.
   2. Composer > allows line break control for hyphens.
   3. Number lines (0-25).
   4. Number characters (0-150).
   5. Apply Settings > Preview test.

5. **Kern > zoom to see**
   1. Adjust space between caps and first words.
   2. Insert cursor > Select 100.
   3. Commands > Opt/alt right arrow > Show palette.
Welcome to the

**EXPEDITION TEA COMPANY™**

Take an extraordinary adventure into the world of tea. **EXPEDITION TEA COMPANY™** carries an extensive array of teas from all the major tea growing regions with some of the very best these estates have to offer. Choose from our selection of teas, gift collections, teapots, or learn how to make your tea drinking experience more enjoyable.

### TEAPOTS

<table>
<thead>
<tr>
<th>Model</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Sherwood Teapot (for three or four)</strong></td>
<td>Capacity: 24 oz. (700 ml) The ever-popular white ceramic teapot. Excellent for 2 with enough tea left to create delicious anxiety as to who will be lucky enough to get the third cup.</td>
</tr>
<tr>
<td><strong>Traditional Japanese Kyusu Teapot</strong></td>
<td>Capacity: 12 oz. (350 ml) Traditional Japanese teapots are known for their unique side handle. A metal mesh screen inside the spout keeps the leaves out of your cup.</td>
</tr>
<tr>
<td><strong>Traditional Korean Infuser Teacup</strong></td>
<td>Capacity: 6 oz. (175 ml) Add leaves, pour water and cover. After steeping, remove lid and turn it upside down. Lift infuser, let the tea drain into cup and place in inverted lid.</td>
</tr>
<tr>
<td><strong>Small Cast Iron Teapot</strong></td>
<td>Capacity: 10 oz. (290 ml) The classic personal Japanese cast iron teapot. Simple and practical, this teapot contains an infuser and retains heat extremely well.</td>
</tr>
<tr>
<td><strong>Large Cast Iron Teapot</strong></td>
<td>Capacity: 22 oz. (650 ml) The classic Japanese teapot. Simple and practical, this teapot contains an infuser and retains heat extremely well to ensure the best brewed tea.</td>
</tr>
<tr>
<td><strong>Henley Infuser Teapot (for two)</strong></td>
<td>Capacity: 14 oz. (400 ml) Our ever popular stainless teapot with built-in mesh infuser basket. Stylish and rugged stainless steel hides fingerprints and keeps your tea hot. Drip-free spout.</td>
</tr>
<tr>
<td><strong>Gold Infuser Teapot</strong></td>
<td>Capacity: 16 oz. (470 ml) Perfect for 2 or 3 friends. A great glass teapot for dress-up or for everyday. The infuser nestles into lid by lifting the handy plunger ball on top.</td>
</tr>
<tr>
<td><strong>Russian Tipping Teapot</strong></td>
<td>Capacity: 24 oz. (700 ml) This quality hotel-grade silver teapot is fit for the Czars of Russia. Includes an infuser. Tilt the teapot on its side to steep and then lift upright to serve.</td>
</tr>
<tr>
<td><strong>Empress Room Tea Strainer</strong></td>
<td>A perfect strainer for loose leaf tea. Place tea into your teapot to steep. When done, place the strainer over your cup as you pour. Set the strainer into the drip bowl when finished.</td>
</tr>
<tr>
<td><strong>3-4-5 Minute Tea Timer</strong></td>
<td>For perfect tea every time. Green, brown and white colored sands fill this fun tea timer that tells you exactly when your favorite tea is properly steeped.</td>
</tr>

About Us
EXPEDITION TEA COMPANY™ was started by a small group of folks who not only love tea, but who are also fascinated by the regional differences in teas, teapots, accessories and the rituals that surrounded this great beverage.

More than Just the Tea
We are committed to providing you not only with the best teas, but also to infuse your life with the story behind the tea. This might include information about the history, health benefits, rituals, accessories, environmental influence as well as ways to improve not only your own experience with tea but that of others as well. Tea is more than just a great beverage.

Ask Us
Our staff includes a professionally certified Grade Three Tea Specialist (Specialty Tea Institute). We love to suggest teas based on what you currently like to help expand your options. Or tell you the history of a particular teapot. And we’ll certainly be drinking a cup of one of our favorites while we do the research.

Shipping Information
We ship our products via USPS Priority Mail. Shipping rates are as follows:
Free shipping for orders $75 and over
For orders up to $9.99 .......................... $3.85
For orders up to $39.99 ......................... $6.85
For orders up to $74.99 ......................... $10.85

Orders are typically shipped the next day, ensuring a prompt and timely delivery of all your packages.

Delivery Time
We ship orders to the forty-eight contiguous US states via the US Priority Mail. Customers will usually receive their order in 2-5 days. We do not offer next day or 2-day shipping at the moment. We will have these options available in the near future. We apologize for any inconvenience this may cause.

Free Shipping
Orders of $75 or more addressed to a physical location within the United States qualify for free Priority Mail shipping.

International Orders
We can ship tea orders to most countries. Delivery outside of the United States takes 1 to 6 weeks to arrive. Email us for shipping and pricing details at tea@expeditiontea.com.

Return Policy
We want you to be happy with your purchase. If for any reason you are not, please e-mail us at tea@expeditiontea.com to arrange for a return and full refund of your purchase.

We will give you a full refund for unopened tea or exchange it. We will deduct the shipping amount if applicable.
Table of Contents – TOC

Overview – Create a Table of Contents (TOC)
1. Each one TOC entry is captured from one Paragraph Style on any document page.
2. Paragraph Styles are captured from any text frame were Paragraph Styles are applied.
3. Paragraph Styles are captured on any page in the InDesign document (.indd) where the Paragraph Style is applied.
4. Create a separate TOC Paragraph Style, so it will have it’s own TOC design.
5. Create a TOC Style (Layout menu > Table of Content Styles).
6. TOC Style is used to capture Document Paragraph Styles to create the TOC.
7. Assign the separate TOC Paragraph Style to TOC entries to design the TOC page.
1 Create Paragraph Styles – for Document
   1 Create Paragraph Styles for the document from Paragraph Styles Palette
   2 Common names: Title, Head, Subhead, Body, Caption.
   3 Specific names: Master Head (for Master Pages).
## Table of Contents – TOC (continued)

2 **Apply Paragraph Styles to Document Paragraphs**
   1 **IMPORTANT**: ensure that **ALL** paragraphs, within the document, have an applied paragraph style – be consistent (example: head, subhead, body). **Including**: return key, returns.
   2 **Apply Paragraph Styles** to document paragraphs from Paragraph Styles Palette.
   3 **Apply Style to (1) paragraph**: Type tool – click ANYWHERE within one paragraph, then choose the style from the Paragraph Styles palette.
   4 **Apply Style to multiple paragraphs**: Type tool – drag select any number of paragraphs, then choose the style from the Paragraph Styles palette.

3 **Create Paragraph Styles – for Table of Contents (TOC)**
   1 Duplicate the existing Paragraph Style, drag to new document icon bottom of palette.
   2 Keep the name, but add TOC as a suffix (ex: Body, Body TOC).
   3 Naming makes it easy to use the right styles to create the TOC.
   4 Change the look and feel easily, by changing any of the style options.
Table of Contents – TOC (continued)

4 Create a Table of Contents Style
1 Layout menu > Table of Contents Styles.
2 TOC Style: Type a name.
3 Title: Blank, use a custom frame.
4 MOST IMPORTANT > Include Paragraph Styles:
   Other Styles: select the FIRST Paragraph Style to appear on TOC, click Add button. TOC will find (capture) ALL occurrences of each listed Paragraph Style, to place into TOC. Other Styles: select the SECOND Paragraph Style to appear on TOC, click Add button.
5 Include Paragraph Styles: Select entry, choose the Entry Style from menu. Menu will list TOC Paragraph Styles. This will design the look and feel of TOC text.
6 Page Number: choose after entry, assign leader dot to tab in Paragraph Style.
5 Make Changes – Document Paragraph Styles
1 Open any Paragraph Style and make a change.
2 Changes effect ALL paragraphs that are controlled by that Paragraph Style.

6 Make Changes – TOC Paragraph Styles
1 IMPORTANT: click Type tool WITHIN any paragraph on the TOC page.
2 Open the Paragraph Style from the palette, double click, then make changes.
3 Changes effect ALL paragraphs that are controlled that TOC Paragraph Style.
4 Turn the Preview check box Off/On or click into another box to Preview the changes.
# Tables – Creation & Editing

## 1 Table overview – creating & editing tables
1. Tables are constructed as a unit inside a text frame.
2. Select whole or parts of a table to make edits: add color, change dimensions, delete, change, merge.

## 2 Table parts (Table Construction)
1. Text Frame
   - Must create a table inside a text frame.
2. Table Construction
   - Columns, rows, cells, headers, footers.
   - Column strokes/fills.
   - Row strokes/fills.
   - Cells strokes/fills (depends on selection).

## 3 Select parts of table
1. Select WHOLE table.
   - Click most upper left cell, see angle arrow icon.
2. Select PARTS of table.
   - Click on EDGE of cell, see straight arrow icon.
   - Drag straight arrow to select multiple cells (and columns or rows).
3. Table Borders
4. Cells (select one cell)
5. Cells (select multiple cells).

## 4 Draw a text frame — all tables work inside a frame
1. Draw a text frame rectangle.
2. IMPORTANT: ALL tables START inside a text FRAME.

## 5 Select text tool, click inside text frame

## 6 Table menu > Insert table

## 7 Merge multiple cells into ONE.
1. Select cells > Table menu > Merge.
2. Use for Header or Title.

## 8 Cell font styles – options bar
1. Change like text styles, select text add styles, use Options Bar

## 9 Merge Cells
1. Merge Cells takes two or more cells in the same ROW and converts them to ONE cell.
   - This is useful to create centered titles.
2. NOTE: Select ONE row at a time to merge cells in that line ONLY.
   - Otherwise, two or more selected cells will become ONE.
